## Regulation G - GAAP Reconciliation

#### Non GAAP Reconciliation of Adjusted EBITDA to Sales Percentage

The Company reports its financial results in accordance with U.S. generally accepted accounting principles (GAAP). However, the Company's management believes that certain non-GAAP financial measures may provide users of this financial information additional meaningful comparisons between current results and results in prior operating periods. Management believes that these non-GAAP financial measures can provide additional meaningful reflection of underlying trends of the business because they provide a comparison of historical information that excludes certain non-operational, non-recurring or intermittently recurring items that impact the overall comparability. See the table below for supplemental financial data and corresponding reconciliations to GAAP financial measures for quarterly adjusted EBITDA as a percentage of net sales. Non-GAAP financial measures should be viewed in addition to, and not as an alternative for, the Company's reported results prepared in accordance with GAAP.
